PLASTIC

Innovation Forum

with special guests the

House Ocean Caucus

presents a Capitol Hill

INNOVATION SHOWCASE

featuring

*recycling, material, manufacturing and design innovations
with positive impact on the ocean.*

Marine Debris is the result of failures in collection, recycling, material and design. But these failures represent business opportunities—opportunities for innovation, ocean conservation, and improved public health.

To encourage business-friendly policies that support innovation with focus on marine debris, over twenty innovators from 10 states across the U.S. and from 4 countries will showcase existing innovations that measurably reduce the impact of plastic on the ocean.

March 16, 2015

Innovation Showcase:

9 am – 5 pm

in the Rayburn Foyer, Rayburn House Office Building, Washington DC

Panel Discussion:

12 – 1 pm

“The role of government in supporting innovation and entrepreneurship that addresses the ocean,” in the Banquet Room B340, Rayburn House Office Building, Washington D.C.

Lunch will be provided. This event meets all House and Senate Ethic rules.

With special guests

Rep. S. Farr (D-CA), Rep. M. Honda (D-CA), Rep. Young (R-AK),
and other members of the House Ocean Caucus and
the Senate Ocean Caucus.
