

Plant-Based Products for the OR

SUSTAINABLY DESIGNED MEDICAL DEVICES,
SURGICAL PRODUCTS, AND PACKAGING

Replace your single-use plastic products with plant-based, clinically developed necessities for use in the operating room.

NewGen Surgical is on a mission to replace plastic in single-use OR essentials with renewable materials across the healthcare ecosystem. Our innovative and circular product design takes an agricultural by-product and upcycles it into a sustainable healthcare solution.

Reduce plastic
production & waste

Eliminate chemicals
of concern

Lower Amount
of CO₂e

The environmental impact of healthcare is significant, with plastics making up 85% of all medical equipment. That equates to five million tons of single-use plastic waste in healthcare each year.

Products that measurably reduce plastic, CO₂e, and chemicals of concern.

Basins and Bowls

35W Skin Stapler

Needle Counters

Procedure Kit Packaging Trays

When compared to a similar leading product made with plastic. Sustainability statements are validated by third-party resources. Always refer to the Instructions for Use for complete instructions, warnings, and precautions. www.newgensurgical.com/ifu CO₂e is a measure that was created by the United Nations' Intergovernmental Panel on Climate Change (IPCC).

Founded in 2012, NewGen Surgical develops sustainable solutions that eliminate and reduce plastic used in healthcare. Our mission is to help deliver quality, cost-effective care while preserving & protecting the foundation of all health - our environment. NewGen Surgical's Small Change, Big Impact EPP program measures your reduction in plastic waste and CO₂e. Monthly or quarterly updates will report your hospital system's measurable impacts with the power of adding plant-based products to replace single-use plastic OR essentials in meaningful numbers.
