### **NewGen Surgical to Exhibit at the 2026 ASCRS Annual Meeting**

**Washington, D.C. – April 10-13, 2026** – NewGen Surgical, a leader in sustainable medical devices, surgical products and healthcare packaging announced that it will exhibit at the 2026 ASCRS Annual Meeting, one of the largest and most influential ophthalmology conferences in the United States. The event will take place in Washington, D.C. from April 10-13, 2026.

The ASCRS Annual Meeting brings together thousands of surgeons, administrators, nurses, and technicians from across the globe to explore the latest innovations in ophthalmic patient care. NewGen Surgical will join more than 200 leading healthcare companies and systems exhibiting in the ASCRS Exhibit Hall.

NewGen Surgical's will showcase its newest line of sustainable surgical products , including the one and two compartment surgical trays. Designed with leading ophthalmologists and made from biobased materials, the line of surgical trays reflects the company's commitment to reduce plastic, CO<sub>2</sub>e and chemicals of concern in healthcare products without compromising clinical performance.

"ASCRS brings together the clinicians who are shaping the future of ophthalmic surgery, and we see sustainability as a core part of that future," said Robert Chase, Founder of NewGen Surgical. "It's an ideal forum to demonstrate our plant-based surgical products that deliver the clinical performance surgeons expect while materially lowering plastic use and emissions."

#### **About NewGen Surgical**

Founded in 2012 in the San Francisco Bay Area, NewGen Surgical, Inc. designs and manufactures sustainable, plant-based surgical products and packaging that replace millions of plastic consumables used in healthcare. Its clinically proven healthcare product lines meet patient-safety standards and are distributed in custom surgical packs to hospitals worldwide, reducing plastic waste and Scope 3 CO<sub>2</sub> emissions.

With more than 13 million units delivered globally, NewGen Surgical, the first to earn USDA BioPreferred Certification for surgical products, is advancing material innovation and the adoption of sustainable surgical products for healthcare.
